Bespoke Jewellery Design Services

Libracraft provide a bespoke jewellery design service to suit all budgets.

Let us create a truly one off precious item of jewellery that will stand the test of time, handmade from scratch by our expert goldsmith that captures your individual style. From a simple contemporary design to something a little more traditional. Alternatively if you have an existing sentimental piece of jewellery, we can easily have that remodelled for you. We understand the importance of how a custom designed bespoke piece using a one off design for an item such as an engagement ring can create lifetime memories for such special occasions. This is becoming an increasingly popular trend.

We make your vision a reality starting with an initial meeting to discuss your requirements with us. You can provide our team with any sketches, images or ideas that you have, together with the materials that you would like us to use and we can then produce a sketch/design to bring your idea to life.

Once you are happy with the design of the item of jewellery we can then proceed and take the design from paper and turn into perfect item of jewellery that you have been looking for.

Established in 1977 we have over 43 years of expertise to draw on and no matter what requirement you have, we can come up with the perfect solution / design for you.

Libracraft Jewellery Designs & Repairs - providing you with the complete jewellery service.
